Softer, warmer materials make these office furnishings inviting

1

1. **SILQ**

MANUFACTURER: Steelcase

PERFORMANCE: SILQ is built from a special polymer that makes it desirably lightweight and stiff, so it provides support.

PRICE RANGE: \$\$

APPLICATIONS: Designers can specify chair frames in the company's high-performance polymer and in carbon fiber, with seats upholstered in a variety of textiles and colors (shown above), including digitally printed fabrics.
